

INFORMATION SECURITY BREACH AND NOTIFICATION

The Board of Education acknowledges the growing concern regarding the need for prompt notification when any computer security breach occurs.

In order to guard against identity theft, the Board directs the Superintendent of Schools to notify persons affected by any security breach that results in the unauthorized acquisition of private information, as defined in Section 208 of the State Technology Law.

Pursuant to Labor Law §203-d, the District will not divulge employee “personal identifying information” except as prescribed by law.

Any breach of the district’s computerized data shall be promptly reported to the Director of Technology and the Superintendent who will then notify the Board of Education.
