

Welcome back to Baker Podcasts! Hi I'm Mrs. Dooley, Library Media Specialist at Baker School. Hi I'm Mrs. Sullivan - one of the science teachers here at Baker. What is happening today? We are back here today to talk to you about what's unfolding in nature!

Yikes, I was looking at your science selfies (nice work) and then I was out on my daily walk and I thought NATURE! If we were in the Baker Library, I would recommend some new nonfiction favorites like, *My Forest Is Green!* It is written by Darren Lebeuf and illustrated by Ashley Barron. The boy in this nonfiction book uses his imagination and is inspired by nature to create rock paintings and etchings and all sorts of nature inspired art. What do you think, Mrs. Sullivan? That's so awesome Mrs. Dooley!

Mrs. Sullivan, can you tell us a little bit about your nature walks? I saw in your science selfies that you like to walk with your dog, Biscuit!

Yes, Mrs. Dooley..I try to get to the beach whenever the weather is nice. Actually, I've even gone on some rainy, dreary days, too! One of the things that I love most about living on Long Island is that, well...it's an island! I love walking along the beach and finding unusual shells, rocks and seaweed. Even the grasses are so much different at the beach! They look like tall, tan reeds rather than the short, green grass we see in our parks and lawns.

Hey all you podcast listeners, we have a challenge for you! Go for a walk and bring along the Nature Scavenger Hunt list - you can even make your own list if you don't want to print it and see how many things you can find! What's your treasure? Look and listen and wonder! And then don't forget if you have any wonderings go to the Baker Tech Links page and click on World Book or World Almanac to find resources to learn more about your spring discoveries! Thanks for listening!
